

Palletizer ST40

The ST40 is a fully automatic palletizing machine with servo motors that firmly stacks bags at very high speed. Thanks to the automatic pallet input and output, production can continue to run uninterrupted. The machine can process up to 32 bags per minute and enables precise stacking, even with overlapping products. Optionally, the machine can be configured with a Dual Purpose manipulator for boxes and crates. You can set and operate the entire machine via the built-in touchscreen. Our palletizers can be configured entirely according to your wishes.

Specifications

- Up to 32 bags per minute*
- Bags up to 900mm length
- Any type of pallet up to 1600mm width
- Touchscreen operation with online connection
- Pallet in and outfeed: fully automatic
