

Palletizer ST8

The 'ST8' is a compact palletizer with a low infeed and a maximum capacity of 12 bags per minute for a full pallet. This machine can be configured for bag and pallet in and outfeed from 3 sides. If desired, this machine can be upgraded to a ST10, which has an automated pallet in and outfeed. You can set and operate the entire machine via the built-in touchscreen. Our palletizers can be configured entirely according to your wishes.
