

SemiPack

Packaging machine

The SemiPack is a bagger for net, burlap and paper bags. It can accommodate bags weighing up to 50 kg, which are manually hung below the filling head. The machine automatically fills and seals the bags using an industrial sewing head. Combined with the BagPlacer converts the SemiPack into a fully automated packaging solution, increasing capacity to up to 15 bags per minute of 25 kg.

Features

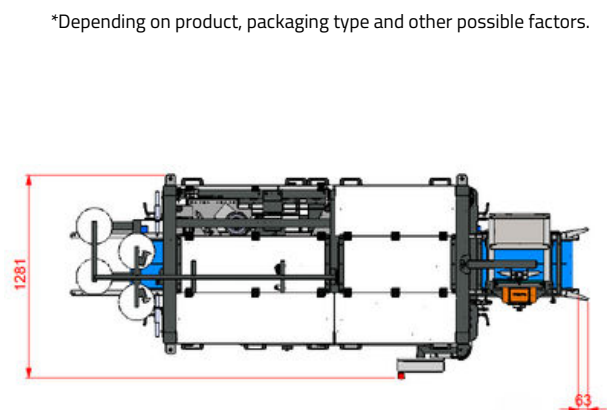

- Exchange filling heads when used for paper and net
- Vibrating belt for gently settling product in the bag
- Highest speed in the market
- Combine with a Bag Placer to create the fully automatic AutoPack (HS)

Options

- Tape dispenser to sew the tape onto the bag
- Label unit to automatically feed the labels into the industrial sewing head

Packaging machine

Specifications:	Values
Packing range:	5 - 50 kg*
Bag width:	450 - 600 mm
Bag height:	560 - 1100 mm
Capacity at 25kg up to:	18 bags/min
IP-rating	IP54
Air consumption: (conditioned dry air)	50 L/min
Supply voltage	3x 400V/50Hz+N+GND (optional 3x 220 Volt 60/Hz + GND)
Power consumption:	5,5 kW
Weight of the machine:	1300 kg

*Depending on product, packaging type and other possible factors.
