

Spare Part Kits

Improve the reliability of your machines with our tailor-made solutions. Discover our 3 grades of spare parts kits, specifically tailored to your machines. Reduce downtime and enjoy optimal support.

First Aid Kit

This kit is composed of parts essential for the operation of the machine. These parts are not easily available locally. Manter recommends having at least these in stock. This kit is intended to prevent downtime.

bending strips, sensors, cylinder heads, gear belts, V-belts, dosing flaps, etc.

Spare Part Kit

This kit is composed of all first aid kit parts supplemented with parts of which Manter recommends keeping some numbers in stock. This kit is intended to prevent downtime and to be able to carry out minimal preventive maintenance.

printed circuit boards, cylinders, cylinder feet, cables, bucket bearings, valves, etc.

Maintenance Kit

This kit contains all parts for periodic and/or major maintenance for your machine. The kit can be put together on "special request" and in consultation with Manter. This is an extensive parts kit.

cylinders, cylinder feet, cylinder heads, bearings, plain bearings, bearing bushes, critical shafts, etc.
